

Project and Development Engineer for District Heating Systems (f/m/d)

Nürnberg/Remote

Fulltime

ASAP

Your Qualifications

- Completed studies in the fields of mechanical engineering, industrial engineering, civil or environmental engineering or a similar discipline.
- Interest in digital work methods and software development
- High reliability and good self-organization
- Knowledge in the topics of energy systems for buildings and districts is an advantage (e.g. via relevant lectures)

What we offer

- Exciting projects in which we support municipal utilities, energy suppliers and local authorities in the planning of new heating networks
- Dynamic team in a growing company
- Modern and digital working methods
- Flexible working hours
- Permanent employment contract with attractive remuneration
- You can work remotely or in our office in the center of Nürnberg
- Many new impulses and room for your personal growth

Your Tasks

As a Project and Development Engineer (f/m/d), you will use our heatbeat Digital Twin to support our customers in the development of innovative concepts for district heating networks and their planning. Your tasks include:

- Holistic evaluation and optimization of heat network systems
- Digital planning of district heating networks , in particular within the framework of "Bundesförderung für effiziente Wärmenetze"
- Further development of our heatbeat Digital Twin
- Municipal heat planning
- Continuous improvement of our processes and products

About us

At heatbeat, we support energy suppliers, municipal utilities and local authorities to better plan and operate their heat supply systems. To do this, we use the heatbeat Digital Twin for digital planning and simulation of these complex energy systems. We are already using the heatbeat Digital Twin in many exciting projects for our customers and would like to develop it further.

With our way of working, we are at the interface between engineering services, software development and planning. We want to accelerate the transformation of energy systems through consistent digitalization and to develop innovative and sustainable solutions for our customers.

We invite you to visit our [homepage](#) for more information and a selection of our projects and use cases, or follow us on [LinkedIn](#).

Application

We are looking forward to your application. If you are interested in the position, just send us a short email with your resume and we will get back to you as soon as possible.
