

Working student (m/f/d) graphic/web design

heatbeat is a start-up that has digitalized the planning and operation of heating network systems. Support our team and actively participate in the energy and heating transition in Germany together with us!

Aachen, Nuremberg,
remote

10 - 20 h/week

as of now

Your profile and your skills

- Ongoing studies
- Enjoy digital working methods
- Creativity and an eye for detail
- Experience in design/web design and the corresponding tools (e.g. Adobe InDesign or Adobe XD) is an advantage
- High reliability and good self-organization

We offer

- Exciting insight into our web development
- Flexible working hours and the opportunity to combine studies and work
- The necessary technical equipment to carry out your work
- Dynamic team in a growing company
- You can work remotely or in our offices in Aachen or Nuremberg
- Lots of new impulses and room for your personal growth

Your tasks

As a working student, you are a full member of our team. You will play a key role in shaping the appearance of our heatbeat Digital Twin and work closely with our software development team. Your tasks will include:

- Creation of user-friendly and function-oriented designs for our web app for heat network planning
- Close collaboration with our software development team to implement your design
- Creation of representative graphics and presentations for our public homepage, advertising appearances and presentations

About us

At heatbeat, we support energy suppliers, municipal utilities and local authorities to better plan and operate their heat supply systems. To do this, we use the heatbeat Digital Twin for digital planning and simulation of these complex energy systems. We are already using the heatbeat Digital Twin in many exciting projects for our customers and would like to develop it further.

With our way of working, we are at the interface between engineering services, software development and planning. We want to accelerate the transformation of energy systems through consistent digitalization and to develop innovative and sustainable solutions for our customers.

We invite you to visit our [homepage](#) for more information and a selection of our projects and use cases, or follow us on [LinkedIn](#).

Application

We are looking forward to your application. If you are interested in the position, just send us a short email with your resume and we will get back to you as soon as possible.
