

Working Student (f/m/d) IT-support

heatbeat is a start-up that has digitalized the planning and operation of heating network systems. Support our team and actively participate in the energy and heating transition in Germany together with us!

Aachen, Nuremberg,
remote

10 h/week

as of now

Your profile and your skills

- Ongoing studies
- Interest in IT infrastructures and digital working methods
- Experience with cloud-based servers, server communication, as well as in the maintenance and care of Microsoft 365 is an advantage
- High reliability and good self-organization

We offer

- Exciting insight into a growing company with a focus on digitalized planning and operational optimization
- Flexible working hours and the opportunity to combine studies and work
- The necessary technical equipment to carry out your work
- Dynamic team
- You can work remotely or in our offices in Aachen or Nuremberg
- Lots of new impulses and room for your personal growth

Your tasks

As a working student, you are a full member of our team. We offer you the opportunity to take on responsibility and gain valuable experience in our company. Your tasks will include:

- Setting up and maintaining our servers for web hosting, databases, GitLab and other services
- Setting up and maintaining our IT infrastructure for day-to-day work and with our customers (Slack, Microsoft 365, CRM, etc.)
- Automation and continuous improvement and automation of our processes

About us

At heatbeat, we support energy suppliers, municipal utilities and local authorities to better plan and operate their heat supply systems. To do this, we use the heatbeat Digital Twin for digital planning and simulation of these complex energy systems. We are already using the heatbeat Digital Twin in many exciting projects for our customers and would like to develop it further.

With our way of working, we are at the interface between engineering services, software development and planning. We want to accelerate the transformation of energy systems through consistent digitalization and to develop innovative and sustainable solutions for our customers.

We invite you to visit our [homepage](#) for more information and a selection of our projects and use cases, or follow us on [LinkedIn](#).

Application

We are looking forward to your application. If you are interested in the position, just send us a short email with your resume and we will get back to you as soon as possible.
